Revolutionary SAP Manager
Powered by Avantra

BENEFITS

- Improved efficiencies by automating repetitive tasks and providing actionable insights

- Real-time monitoring and analysis optimise system performance

- Automatic performance based scaling in cloud, multi-cloud and hybrid landscapes

- Seamless transition as a replacement for SAP Solution Manager

- Automated checks and audit trails ensure adherence to security and compliance standards

A SMARTER ALTERNATIVE TO SAP SOLUTION MANAGER

Revolutionary SAP Manager is a next-generation platform designed to seamlessly replace much of SAP Solution Manager, which will no longer be supported after 2027. The platform uses advanced Artificial Intelligence for IT Operations (AIOps) to integrate real-time observability, strategic workflow automation, and powerful analytics to streamline and enhance SAP landscape management. Revolutionary SAP Manager is a more comprehensive solution than SAP's replacement, SAP Cloud ALM.

Revolutionary SAP Manager Capabilities

Advanced AI automation: Revolutionary SAP Manager automates routine operations, leveraging agents to monitor, detect, and address system issues proactively, reducing manual intervention and freeing up valuable resources. The automation engine supports complex workflows for both SAP and non-SAP applications.

Real-time observability: The platform boasts 24/7 monitoring of SAP and non-SAP systems, identifying potential issues and inefficiencies faster than SAP Solution Manager. This ensures businesses maintain optimal performance and quickly address any irregularities.

Intelligent insights: Get in-depth root cause analysis, preventive maintenance recommendations, automatic alert generation and resolution, along with executive summaries.

End-to-end encrypted secure communications: With security features unavailable in SAP Solution Manager, Revolutionary SAP Manager establishes a secure and cohesive IT environment. It supports encrypted communication between agents and the central server using HTTPS to provide safe data storage and interaction with third-party solutions. All monitoring data is securely stored in the platform server database.

User-friendly interface: Revolutionary SAP Manager offers a web-based user interface, optimised for both desktop and mobile devices, which allows easy access to system data and management tools.

Predictive analytics: The platform leverages predictive analytics to anticipate potential system issues before they impact business operations, minimising downtime and enhancing system reliability.

Seamless integrations: Revolutionary SAP Manager integrates with ITSM Tools like ServiceNow, PagerDuty, and Slack, and provides native integration with hyperscalers like AWS, Azure, and Google Cloud. The platform also supports custom integrations with various third-party systems.

Comparison With SAP Solution Manager and SAP Cloud ALM

Feature	Revolutionary SAP Manager	SAP Solution Manager	SAP Cloud ALM
Deployment	On-premise, cloud, or hybrid	Primarily on-premise, limited RISE	Cloud-native
Comprehensive automation	Yes, including Cloud-based auto-scaling	No, manual intervention needed	No, limited to cloud operations
Real-time monitoring	Yes, AI-powered	No, basic monitoring, prone to alert fatigue	Yes, cloud-focused
Advanced AI-driven predictive analytics	Yes	No, basic analytics	Yes
Extensive Integration with third-party tools and cloud	Yes	No, limited integration options	No, focused on SAP Cloud
User-friendly, optimised for desktop and mobile	Yes	No, complex and requires extensive training	No, cloud interface not mobile-optimised
Highly scalable for large SAP landscapes	Yes	Yes, but complex	No, designed for cloud scalability
Role-based access	Yes	Yes, but complex setup required	Yes
Encryption	Yes	Yes, but complex setup required	Yes
Automated processes change management	Yes	With ChaRM but complex	No, simplified for cloud environments
Fast, seamless upgrades	Yes	No	Yes
Compatible with older SAP versions	Yes	Yes	Limited

Need the full functionality of SAP ChaRM?

Support Revolution also offers Revolutionary SAP Change Manager, powered by REALTECH. Revolutionary SAP Change Manager is a smart alternative to the SAP ChaRM component in SAP Solution Manager, designed to streamline and automate the software deployment process while delivering rapid implementation and out-of-the-box ITSM integrations. Combine Revolutionary SAP Manager with Revolutionary SAP Change Manager for a comprehensive replacement to SAP Solution Manager.

SUPPORT REVOLUTION SAP SUPPORT BENEFITS

- Up to 90% savings compared to SAP support costs
- Full SAP support including S/4 HANA
- Comprehensive security protection
- Support for SAP customisations
- Tax, Legal, and Regulatory updates for all versions
- Fast response and resolution SLAs
- Assigned Primary Support Engineers and Account Managers
